

# Graduation or practice?

## Why not both?

It is time to put theory into practice at the place where your ideas and knowledge are valued. If you already are one of the best students, why waste time? This two-in-one offer is made for outstanding students of the final year who desire and can do more.

Scholarship programs eligible for students from Faculty of Engineering in Belgrade, Faculty of Technical Sciences in Novi Sad and Faculty of Electronic Engineering in Nis, are in duration of 10 months, meaning that the best students chosen for the program will receive Elsys Eastern Europe scholarship in the amount of **20.000 RSD** on monthly base.

In those 10 months, students have the obligation to participate in one of our available trainings by their choice. For students from Faculties in Belgrade and Novi Sad, training can be part-time in duration of 1 to 6 months, depending on a chosen training program and in agreement with students or it can be full-time during our annual summer internship. For students from the Faculty in Nis, training is held only as a part of our annual summer internship.

**Faculty Of Electrical Engineering In Belgrade**  
Electrical Engineering And Computer / Electronics department

**Faculty Of Technical Sciences In Novi Sad**  
E1 - Embedded Systems And Algorithms / E1 - Microelectronics

**Faculty Of Electronic Engineering In Niš**  
Electronic Circuits And Embedded Systems (EKES)  
Microelectronics

### >Benefits<

This is the opportunity to improve your skills in the field of digital, analog and mixed-signal integrated circuits in the company Elsys Eastern Europe.

You will receive training from the most experienced engineers in the region to help you become an engineer ready to work on commercial projects.

Health is priority number one; therefore, our program can be remote with respect to office work time, or it can be held in our office. It is completely optional and as agreed with the candidate.

The project you are working on can be the topic of the graduate, master thesis or seminar paper.

The knowledge and firsthand experience you will get out of your scholarship is priceless. However, we will still provide you with additional financial support during your scholarship program in amount of **RSD 20,000** monthly.

**Submit your application before 29th October for Niš,  
31st October for Belgrade, and 27th November for Novi Sad**

### >Requirements<

Students of the Faculty of Electrical Engineering in Belgrade, Faculty of Technical Sciences in Novi Sad or the Faculty of Electronic Engineering in Niš who have successfully enrolled the fourth year of studies and are listening seventh semester are eligible to apply.

No other scholarship approved by another company in the same period.
