

Junior DevOps Engineer

Vast is a platform that informs confident decisions in complex and high-risk environments, powered by large datasets and surfaced by artificial intelligence (AI), for automotive and real estate enterprise clients and consumers alike. Collecting and analyzing data since its founding in 2005, Vast has become the premier provider of Big Data solutions for many of the largest Global 1000 businesses, like Chase, Capital One and HSBC.

As a Junior DevOps Engineer you'll join our Operations team. You will be working closely with Engineering to build, maintain and optimize anything from Java/Scala services, Node.js applications and Cassandra clusters.

We are looking for:

- BSc / MS graduated or final year students in Computer Science / Engineering or relevant working experience
- Passionate learner with a genuine interest in AWS and Linux system administration
- Proactive communication in both written and spoken English
- Participation in the 24x7, multi-tier on-call rotation

You will be working with our tech stack:

- AWS cloud-based infrastructure
- Linux Red Hat and Ubuntu based distributions
- TeamCity, Rundeck, Prometheus, Alerta and Chef
- Standard system tools such as awk, sed, grep, top, ps, lsof and cron
- Bash and Python for system programming and scripting

Some of the benefits of working at Vast include:

- Competitive compensation
- Snacks, beverages, sport activities and English classes
- Working with a top-notch technical team spread across Serbia and the USA
- Opportunities to acquire new technical skills and work with the latest technologies

If you're a quick learner and excited to work on our tech stack – please reach out to us, we'll be glad to meet you. Feel free to send your resume to career@vast.com and specify for which position you are applying.
