at

... unified at the core

About us

AGGIOS is a young Serbian-American technology company developing operating systems software for smartphones and other electronic devices with stringent energy requirements. Our innovative software complements standard Linux and Android operating systems to improve power, security and thermal characteristics of modern multicore architectures. AGGIOS was founded by a team of former technology executives of ARM and Qualcomm with support from a group of professors from UC Berkeley and Princeton University.

About the internship program

AGGIOS Belgrade is offering 3-6 month internships in the areas of power management, firmware and operating system software development. Chosen candidates will be working with cutting edge embedded systems, such as the latest smartphone platforms like TI OMAP or Nvidia Tegra. After successful completion of the internship program selected candidates shall be offered full time positions at AGGIOS Belgrade.

About you

In order to be considered for our internship program you must meet the following qualifications:

- Final year of bachelors degree or in masters program of electrical engineering or computer science
- Good C-programming skills
- English language proficiency
