# Introduction

Our company Délmagyarországi Vasbetonipari Kft, founded in 1991, has become – from the old house element factory – a successful enterprise engaged in the production of industrial and communal construction structures. Our product portfolio has been changing since our foundation according to the actual market requirements. In the early 90s we have started the production and use of precast concrete cup necks for building structures. In the late 90s we also got engaged in the manufacturing of special transformer house panels.

With the grandstand designs developed within the stadium reconstruction program in the early years of 2000 we designed, manufactured and built the structure of several football stadiums (Nyíregyháza, Székesfehérvár, Pápa, Zalaegerszeg, Sopron, Kaposvár II.). With this system we installed several sport facilities (Szeged, Kiskunfélegyháza), ice hall (UTE), grandstands of race track (Kincsempark), outdoor theatre (Tihany), and an university auditorium (Budapest Polytechnic), also.

We manufacture and construct different structures of industrial halls and warehouses, commercial centers, sport and education facilities

Our products – precast cup necks, joist, columns, beams, stairs, wall panels, grandstands and other panels – were installed in Hungary and abroad (Slovakia, Romania and Serbia), as well.

Our company comprises a structure designer team besides our colleagues engaged in production, which are responsible for the technological requirements of the manufacturing and the production designs, too. Transport and installation is carried out by our contracted partners.

At our site in Szeged, DÉLÉP Industrial Park, the requirements of the continuous production throughout the whole year are ensured in our industrial hall, also equipped with bridge cranes and a multilane outdoor production hall and warehouse.

**ISO Quality Management System** was introduced in 2001, which is continuously being developed in order to meet the requirements of our clients in all aspects.

In October 2013 **production control** of our portfolio has been introduced within 2+ system, enabling to achieve **CE** marking for certain products.

# Our references

## 2002-2004

- RUF Electronics industrial hall, Ajka
- Média-Markt store, Szeged
- Extension of the Sport stadium, Szeged
- Stadium grandstands: Nyíregyháza, Székesfehérvár, Pápa, Zalaegerszeg, Sopron, Kaposvár-II
