### **You need to have:**

---

1. Minimum 5 years of experience in executing electrical systems installation for construction projects
2. Solid knowledge of project management tools such as PrimaVera
3. Good knowledge of drawing AutoCAD is a must
4. Knowledge of electrical codes (NEC, BS, NFPA...)
5. Knowledge of electrical and power calculation software (lighting design...)

### **It would be considered advantage if you have:**

---

1. Knowledge in Visio
2. Knowledge of developing methods statements and Testing & Commissioning procedures
3. Ability to manage the Low Current project execution from initiation to closure
4. Ability to manage the project's field staff and subcontractor performance
5. Ability of ensuring quality and safety to ensure compliance with the contract documents
6. Ability to program all Low Current systems
7. Ability to train the technician and site engineers on all systems

### **In return we offer:**

---

1. Full-time employment
2. Competitive Salary
3. An opportunity to take part in cutting-edge projects
4. A career path development
