Vast

Vast.com is the leader in vertical search for cars, travel and real estate. A successful, thriving Internet start-up, Vast provides its decision-making tools to customers and sellers in the midst of complicated purchases. Through Fortune 500 publishers such as Yahoo!, USAA, CarFax, Southwest, and AOL, Vast supports consumers through the lengthy sales cycles involved in the biggest monetary decisions of their lives: their homes, their cars, and their vacations.

We are looking for a:

Software Engineer

to join our team in Belgrade

You need to have:

- BSc / MS degree (ETF/MATF/FON), or relevant experience
- Strong Computer Science background (algorithms, data structures, software design)
- Excellent knowledge of Java
- Experience in development on Unix/Linux platform
- Knowledge of scripting languages (Ruby/Python)

Ideal candidate profile:

- A keen interest in learning and applying new technologies
- An In-depth knowledge of design and architectural patterns which enables you to make the right technical decisions
- Capable of expressing yourself in a way your audience understands
- You like clean code
- Taking responsibility for others, helping them and guiding them if necessary
- Your development skills are valued more than the length of your professional experience

About the Position

You will be joining the Data Engineering team, in charge of Vast Platform for Large – Scale Data Processing, Analysis of vast amounts of user generated data (web logs) and Vertical Search. You will help with keeping Vast's big data advantages, such as our 6 million car listings with the best sorting, market and user traffic analytics data from running some of the biggest Automotive search sites in US for years.

Our company is growing fast, but the most exciting work is yet to come. We need you for that. For more information check this link. **Please send your resume to** etf@vast.com.
