

NOFFZ 2022 Internship Program

We are looking for young talents. Join us!

NOFFZ Technologies is a global development service provider and system integrator. We realize products and electronic components as well as turnkey and innovative measurement and automation systems. We are an owner-managed family business with a successful, 30-year company history and on course for international growth.

Student internship program

We are looking for young talented electrical engineering students to join our development team in Belgrade. During our internship program you will first get a professional training in using industry standard software and hardware platforms, after which you will be assigned with a project. As a part of the project team, you will get your first hand experience of working on solving complex testing challenges in automotive industry.

Throughout entire internship program you will be closely mentored by one of our experienced engineers.

What we offer:

- ▶ 2-4 months internship, longer period is also possible
- ▶ Paid internship with option of full time employment
- ▶ Flexible work hours
- ▶ Possibility of final thesis development (with agreement of mentoring professor)
- ▶ A pleasant working atmosphere where family culture and respect are core values
- ▶ All company resources at your disposal - instrumentation, lab, mentoring , ...

Your qualifications:

- ▶ Students of final year of bachelor studies or master studies
- ▶ Departments of Signal & Systems, Electronics or Telecommunication
- ▶ Enthusiastic about working with both software and hardware, measurement technologies, data processing algorithms and problem solving
